- Comfortable, Generous Fit
- Tailored Construction
- Ideal for Layering
- Engineered for Movement
- Reduces Heat Exhaustion

## ADD ON

- Name Patch
- Company Patch
- Reflective Striping
- Screen Printing
- Reflective Transfers

## hidden details:

If you look closely at our shirt you will notice some tailored features which distinguish it from other FR shirts. The collar points are held down with a button & loop that is cleverly concealed underneath the collar. The wrist opening is tailor constructed with a clean bias edge like a men's dress shirt. In addition, each cuff has a two-button closure. Our most appreciated detail is the under arm gusset. This is a separate piece of material which allows for greater arm movement and a larger arm opening for comfort.
